EXPERIENCE

Desktop Support Technician at LeBow Technical Services

October 2013 - Current

- Resolve technical issues for LeBow College of Business faculty and staff through tier one and two support
- Research and document uncommon hardware and software issues that are encountered
- Support AMX-powered SMART classrooms and related AV technology for the newly built Gerri C. LeBow Hall
- Facilitate upgrades through Microsoft SCCM to deploy encrypted operating systems and updated software

Peer Leader at LeBow College of Business

June 2014 - December 2014

- Mentor a class of incoming freshmen in the business school and serve as a classroom leader
- Support students in their first term by staying accessible and offering academic assistance
- Encourage students to get involved by emphasizing networking and attendance at LeBow business events

PROJECTS

Coopswitch

May 2014 - Current

- Developed a website using vanilla PHP and MySQL along with Twitter's Bootstrap HTML framework for the user interface
- Implemented JQuery and other open source libraries for speed, security, and design elements
- Designed for use by Drexel University's Steinbright Career Development Center so students can easily switch co-op cycles

EventMe

October 2014 - Current

- Created a ticketing solution that uses student ID cards instead of actual tickets for venues to improve event access speed
- Designed the web app to make efficient AJAX lookups to lessen network burden and bandwidth requirements
- Implemented the ability to be integrated with existing payment processors for greater flexibility with end users

Merecraft

April 2013 - August 2014

- Established a 400 person community and coordinated staff members who served as in-game moderators
- Optimized and supported an unmanaged Linux sever running a LAMP web server and backups utilizing Amazon Web Services
- Utilized a payment solution with streamlined Bitcoin integration for a higher customer conversion rate
